Digital services
Clamping technology

Find. Select. Configure.

Hand in hand for tomorrow

Configurators

Fast. Online. Customized.

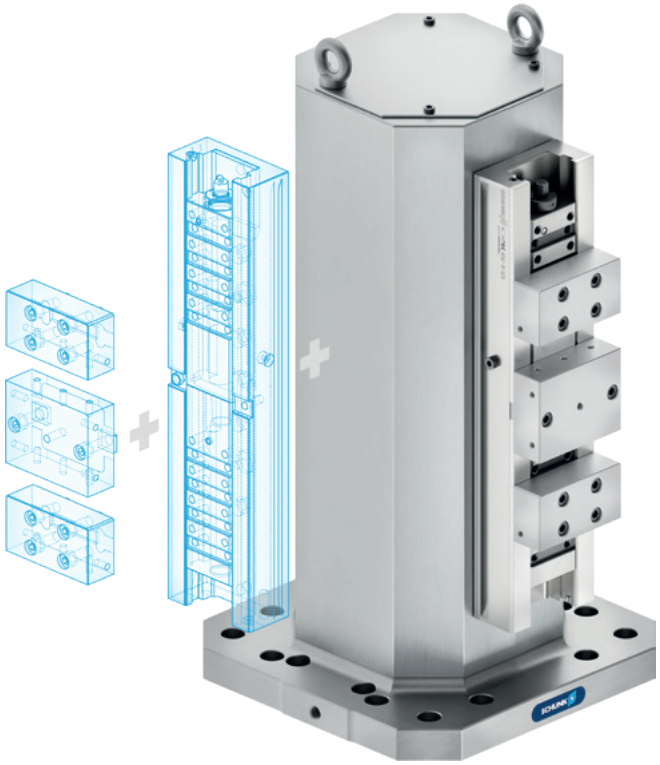

Experience the synergy of efficiency and transparency with our pioneering configurators for toolholder mountings, chuck jaws and manual clamping systems. Access is very easy via the web browser, allowing you to not only use the user-friendly configuration, but also to download the CAD data directly.

The best thing about it is that there is no development knowledge required, and depending on the configurator, you can retrieve information on prices and delivery times. Discover a new dimension of customization options and increase the efficiency of your production

Clamping system configurator

Complete clamping solutions can be combined as desired

NEU

Limitless possibilities

Thanks to a wide selection of quick-change pallet technology, clamping force blocks, vises, and tombstones

3D data in real time

Visualize the desired product, download as .step data, and export parts lists

Preconfigured solutions to get you started

Extensive collection of customer solutions to find inspiration for your manufacturing

schunk.com/clamping-system-configurator

easy Toolholder
Customized toolholder configuration

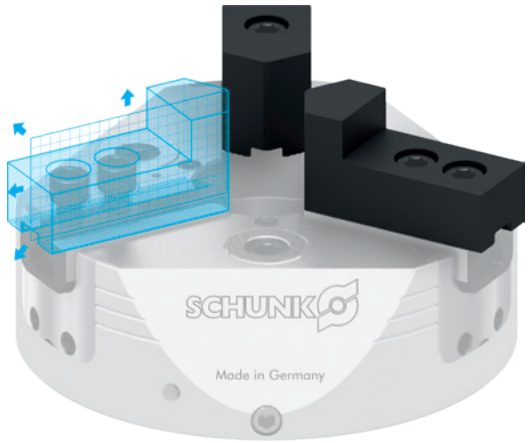

schunk.com/easytoolholder

Flexible configuration
Individual adaptation to geometries, selection of clamping diameters and of machine interface, with or without data carrier chip and peripheral cooling

3D data in real time
View and download the configuration in different formats in real time

Simple inquiry and ordering process, 24/7
Inquiries and orders are processed directly via the configurator; prices and delivery times are calculated instantly

easyJAW
Individual chuck jaws delivered within 1 to 3 weeks

schunk.com/easyjaw

Flexible configuration
From over 500 standard variants of soft top jaws, intermediate jaws, full grip jaws, monoblock jaws, claw jaws, and RAPIDO

Geometries of the chuck jaws can be individually adjusted
Derived from the respective standard variant, freely configurable

Simple inquiry and order process 24/7
Inquiries and orders are processed directly via the configurator; prices and delivery times are calculated instantly

Quickfinder

Select the right product in just a few clicks

With the SCHUNK product finders, you can easily, reliably, and precisely select the right products from the portfolio for any application.

Professional

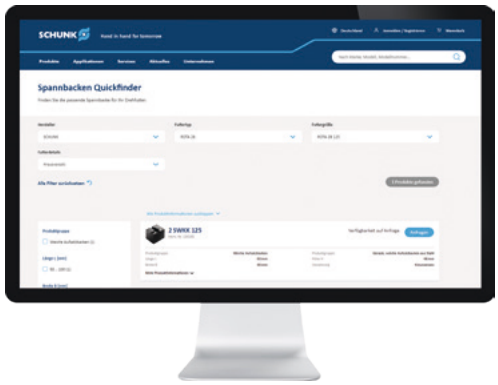

Designed for specialists, characterized by maximum accuracy and precision.

Personalized and reliable

Reliable product selection thanks to clearly presented performance parameters.

International

Multilingual, available worldwide in 13 languages.

Chuck jaws

Lathe chuck and stationary workholding

Find the right chuck jaws for your clamping task. The chuck jaw quickfinder helps you find the optimal solution in just a few steps. Choose between chuck jaws for lathe chucks or stationary workholding, and filter according to your requirements specifically.

schunk.com/chuckjaw-quickfinder

Toolholders

Find the right toolholder for your requirements. Use the filter functions to select toolholders based on relevant criteria such as interface, clamping diameter, projecting length, or torque. This is how you can efficiently find the right solution for stable and process-reliable machining processes.
